

## FOR IMMEDIATE RELEASE

### **Reef Arches Partners with Plant A Million Corals to Launch "Instant Barrier Reef" Initiative for Coral Reef Restoration**

*Innovative Collaboration Aims to Foster Sustainable Coral Growth and Coastal Resilience*

West Palm Beach, Florida — 9/30/2024 — Reef Arches is excited to announce the launch of their "*Instant Barrier Reef*" initiative in partnership with the Plant A Million Corals Foundation, a groundbreaking effort dedicated to restoring coral reefs through innovative techniques and sustainable practices. This collaboration seeks to enhance coral restoration efforts while boosting coastal resilience in the face of natural disasters.

The Plant A Million Corals Foundation operates Summerland Farms, a pioneering coral nursery located in Summerland Key, Florida. With the ambitious goal of producing 1 million corals by the end of 2025, the nursery employs cutting-edge micro-fragmentation techniques to cultivate a diverse range of coral species created by Dr. David Vaughan.

"We are thrilled to launch the 'Instant Barrier Reef' initiative alongside the Plant A Million Corals Foundation," said Nicholas Bourdon, Co-founder of Reef Arches. "This strategic partnership enables us to create impactful solutions for coral restoration that serve both as barrier reefs and vibrant attractions for tourism and fishing/diving spots. Together our technologies launch us at the forefront of coral restoration to apply globally."

"The potential impact of our joint efforts is immense. Our combined technologies will not only reinforce the structural integrity of coral reefs but also support a diverse marine ecosystem, contributing to the overall resilience of oceanic environments," said [Plant A Million Corals Representative's Name], [Their Title] at Plant A Million Corals. "This partnership has the potential to set a new benchmark in reef restoration, demonstrating how innovative approaches can drive substantial progress in environmental conservation. We are excited about the prospect of working together and are confident that our collaboration will yield transformative results for reef ecosystems worldwide. The alignment of our missions and technologies positions us to make a significant and positive difference in marine conservation."

This partnership will facilitate knowledge sharing and resource development, allowing both organizations to better serve coastal communities and promote sustainable practices in marine restoration. Plant A Million Corals exemplifies innovation in coral restoration by utilizing a groundbreaking method by Dr. David Vaughan.

Reef Arches and Plant A Million Corals invite stakeholders, conservationists, and the public to engage in this vital initiative to protect and restore our oceans.
